Web Accessibility Statement

QRCodeKIT

QRCodeKIT is committed to providing an accessible experience for all users. We work to improve the accessibility of our website and services and to support the use of assistive technologies.

As part of our commitment to accessibility and in preparation for an Accessibility Conformance Report (ACR) based on the VPAT® International Edition, we have reviewed the accessibility of our website (https://qrcodekit.com/) against WCAG 2.2 Level AA (and applicable WCAG 2.0/2.1 success criteria), Revised Section 508, and EN 301 549. This review helps us identify areas for improvement and informs our ongoing accessibility efforts.

We take ongoing steps to improve accessibility, including coordinated review and testing by the Technical, Support, and Legal teams, and prioritizing accessibility improvements as part of continuous development.

QRCodeKIT is designed to work with modern browsers and common assistive technologies, including screen readers, magnification/zoom, and keyboard-only navigation.

While we work to provide an accessible experience and strive to meet all applicable accessibility requirements, please be aware that certain areas may not fully comply with all criteria at all times. We consider the review and resolution of known issues to be an ongoing process and a core part of our continuous improvement efforts.

If you experience accessibility-related difficulties when using QRCodeKIT, contact support@qrcodekit.com, providing the page or feature you are having trouble with, a brief description of the issue, and (optionally) your browser/device and assistive technology.

QRCodeKIT is under continuous development. Features, content, and accessibility behaviors may change over time as updates are released. This statement reflects our approach and efforts at the time of publication and will be reviewed periodically.
